

HASENKOPF

DESIGN LINE 2

WASHING TABLE

The Hasenkopf Design Line 2 impresses with a skilful combination of a white shell made of solid surface material with seamlessly integrated basins, of which there are four to choose from. This ensures an effective appearance. The elegant design is further emphasized by the high-quality workmanship and the traditionally finger-jointed drawers made of solid wood.

WASHING TABLE

The clear, filigree body made of solid surface material with under-mount basins and drawer fronts made of real wood veneer or solid surface material makes for an effective appearance, both visually and functionally. The high-quality washbasins in the Design Line 2 score points for durability and easy care. The individual adjustment in length and width can be freely selected via our configurator. The easy-to-install washbasin can be combined with our matching design mirror to complete your bathroom in an expressive way.
