HASENKOPF

Since 1964, Hasenkopf has stood for craftwork, innovation and excellence. Today, we stand out as an expert in the processing of solid surface materials and a reliable supplier for our partners. With a variety of production techniques, we realize outstanding projects using premium materials. Special machining, forming and casting processes give us the opportunity to implement bespoke designs in the fields of plumbing, living areas or medicine, facades and indoor and outdoor projects. Our partners rely on our years of experience and our focus on handcrafted perfection. Thanks to our high standards for quality, we can create unique items, both on a one-off basis and in batch production. As a regional supply specialist, we offer our customers comprehensive service during planning and realization for every project.

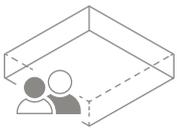

Thanks to our many years of experience, we produce custom drawers ready for assembly. Whether doweled, dovetailed or mitered – lacquered, oiled or untreated – with notches and drills holes for high-quality runner systems: Simply chose a profile and we will manufacture exactly the drawer you need according to your specifications. And with our practical interior partitions and inserts, you will find the right accessories for every purpose. We make simple things unique and unique things simple.

Simply Special

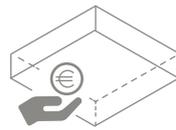

DRAWERS FULL OF QUALITY

Customer satisfaction is our highest priority. That's why, in every processing stage, quality that the end user can see and feel flows into the drawers. From personalized advice via technical passion and precision to customer-oriented, uncomplicated ordering, Hasenkopf stands for quality in the manufacture of drawers. This means that each customer gets their individual drawer full of a quality promise – for over 55 years.

Doweled on 3 sides

Customer-mounted external fronts

CORNER JOINTS

If necessary, drawers can be made with the desired corner joints.

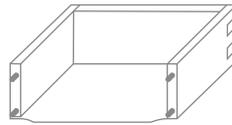

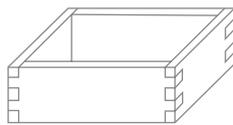

Three-sided drawers with no front panels are also possible. On request, dowels can be installed to mount the front panel at site.

DOVETAILED

Dovetails refine the look of a solid wooden drawer and accentuate its technical sophistication.

The dovetail spacing for Hasenkopf drawers is 10mm. On request, 15mm can also be manufactured. Solid wood and plywood drawers are suitable for dovetail corner joints.

KITCHEN DRAWERS WITH DIVIDERS & INSERTS

Smart kitchens support users with forward-thinking planning of future working areas and sensible organization systems. Hasenkopf drawers also contribute to a smooth cooking experience. Dividers and inserts provide structure for the drawer and can be flexibly adjusted to meet the customer's requirements.

The partitions and inserts are available as a complete system in solid wood with drawers and underside runners as standard. Common solid wood heights can be used in any width of drawer. For kitchen drawers, there is a choice between a 4-sided doveled corner joint and a 4-sided dovetailed corner joint.

DIVIDERS

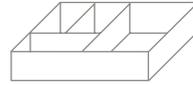

Drawer dividers can be made in fixed spacings after selecting the position. Flexible dividers are also possible. Here, metal pins are positioned at the appropriate location using a grid system. The divider with its groove on the front can be attached at this position. By moving the pins, the dividers can also be repositioned. The dividers, with a material thickness of 8mm, can be made up to a height of 160mm.

- Cutlery drawer with fixed dividers
- Utensil drawer with flexible dividers
- Plate drawer with flexible dividers
- Pot-and-pan drawer with flexible dividers

All partitions are made to measure. In addition to the fixed range of dividers and inserts for kitchen drawers, all designs can also be freely combined with each other.

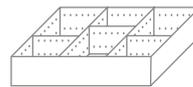

CUTLERY DRAWER WITH FIXED DIVIDERS

- Spacing between the dividers approx. 80 mm
- Fixed partitions
- Standard bottom in 7 mm MDF veneered

POT-AND-PAN DRAWER WITH FLEXIBLE DIVIDERS

- Inclined cross divider at the back, adjustable as lid holder
- Thickness of the divider: 13 mm
- Standard bottom in 7 mm MDF veneered

Article no. TOPF

INSERTS

Drawer inserts have the advantage that they can be removed from the drawer together with their contents. This allows for attractive presentation of high-quality contents such as glasses, jewellery or cutlery. The drawer inserts are particularly well-suited to use in the kitchen. For shop-fitting or fair construction or for decorative furniture and wardrobes.

- Cutlery drawer insert
- Knife drawer insert
- Spice drawer insert

All dividers are made to measure. In addition to the fixed range of dividers and inserts for kitchen drawers, all designs can also be freely combined with each other.

COMBINATIONS

The organization systems for drawers can also be combined. As with the drawer partitions and inserts, combinations are available in solid wood in common solid wood heights. In addition, all widths can be manufactured. However, it is still recommended to contact us in advance regarding the desired options, in order to clarify any questions.

FLOCKING

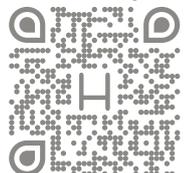

Flocking is possible for both fixed dividers and for removable inserts. This gives the drawer organization system a velvety surface. On request, the bottom of the drawer alone can also be flocked. Three-dimensional free-form shapes can be created and flocked precisely according to the customer's requests. The flocking is available in various colors. Feel free to contact us to find out more about your options.

The quote also includes inserts in standard sizes. On the Hasenkopf website, you can download drawings of the standard inserts.

www.hasenkopf.de/produkte/schubladen/kuechenschubladen

GUIDE SYSTEMS

If necessary, the matching Blum guide system can be ordered alongside Hasenkopf drawers. Whether you need soft-close, tip-on or synchronization – every drawer is equipped with the runner system required. On request, the couplings can also be installed or a side-stabilizer delivered with the drawers.
